

Certification training

Risk Management Professional

PMI-RMP

PMI Risk Management Professional

Training for the PMI-RMP exam: building the risk strategy and plan, identifying risks and analysing them qualitatively and quantitatively, then responding and monitoring through to closure.

Delivered by Vertex Business, a professional certification training provider.

5 domains
per PMI's outline

Qualitative
and quantitative

Risk management is an early decision, not a late reaction.

About the training

On many projects the risk register is filled in once and forgotten. PMI-RMP tests whether you can make risk part of how the project is run: find what threatens the objectives, size its effect, choose a response and follow it up.

The exam at a glance

115 questions in the exam	150 minutes exam time	5 domains in the exam outline
--	------------------------------------	--

Per PMI's PMI-RMP page and Exam Content Outline updated January 2023, accessed 15 October 2026. The exam is offered in English, Arabic and Simplified Chinese.

What the training focuses on

Concept and tool

When a probability-impact matrix is enough, and when to go quantitative.

Judgement in context

Choosing the right next step when a risk appears or occurs.

SITUATIONAL ITEMS

How to work through a situational item

01

Locate the stage

Planning, identification, analysis, response or monitoring?

02

Separate risk from issue

Is it a possible event, or has it happened?

03

Follow the process

The step that comes before the decision, first.

For those asked what could derail a project before it does.

This suits you if you:

- ✓ **Manage projects or programs**
And want a method for risk, not instinct.
- ✓ **Work in a PMO**
And prepare risk reports and maintain the register.
- ✓ **Hold the PMP**
And want to specialize in one area in depth.
- ✓ **Work in quality, governance or compliance**
And help assess the risks of initiatives.

Roles close to this specialism

Illustrative roles that use this knowledge; hiring requirements vary by employer.

- ✓ **Project risk manager**
Leads the risk plan and presents it to management.
- ✓ **Risk analyst**
Estimates probability and impact and builds the quantitative analysis.
- ✓ **PMO specialist**
Standardizes risk tools across projects.
- ✓ **Project manager**
Builds responses into the schedule and budget.

ELIGIBILITY AND LANGUAGE

Before you apply for the exam

Three eligibility routes

Depending on education: project risk experience plus risk education hours, as in the table.

Exam language

Choose Arabic, English or Simplified Chinese.

Renewal

Earn 30 PDUs every three years to renew.

Eligibility details on PMI's official page [↗](#)

The five PMI-RMP exam domains

PMI's outline splits the exam into five domains that follow the risk cycle. Identification and analysis together make up almost half.

Exam Content Outline

Risk Strategy and Planning

22%

Risk appetite and thresholds

The risk management plan

Roles and escalation

Risk Identification

23%

Workshops and interviews

Assumptions and constraints

Writing risks and the register

Risk Analysis

23%

Probability-impact matrix

Expected monetary value

Monte Carlo simulation

Risk Response

13%

Threat and opportunity responses

Owners and reserves

Contingency plans

Monitor and Close Risks

19%

Triggers and indicators

Register updates and reports

Lessons learned

Eligibility routes

Education	Project risk experience	Risk education
Secondary diploma	36 months within the last 5 years	40 hours
Bachelor's degree	24 months	30 hours
GAC-accredited bachelor's	12 months	30 hours

Source: PMI's PMI-RMP page and Exam Content Outline, accessed 15 October 2026. Items under each domain are an illustrative summary.

Every domain shows up as a project decision.

Each domain is taught through the concept, then the tool, then a project case that calls for a decision.

01 Strategy and identification

Setting the organization's risk appetite and thresholds, writing the risk plan, and running an identification workshop.

Applied example The sponsor accepts a two-week delay; the client will not accept one day.

02 Qualitative and quantitative analysis

Ranking risks by probability and impact, then expected value, sensitivity analysis and decision trees.

Applied example Is a backup supplier worth its extra cost to cut the delay risk?

03 Response and monitoring

Choosing a response and its owner, setting reserves, and tracking triggers until the risk closes.

Applied example The shipment-delay trigger fired, and nobody acted.

LEARNING OUTCOMES

What you will be able to do

01 Write a risk plan

With thresholds, roles and escalation.

02 State a risk clearly

Cause, event and effect on the objective.

03 Quantify the effect

With expected value and decision trees.

04 Track responses

And measure their effect before closure.

Risk is understood through cases and calculation together.

A register for your project

Build a register for a project you know and extend it with each domain: identify, analyse, respond.

Links the five domains in one file.

Calculation drills

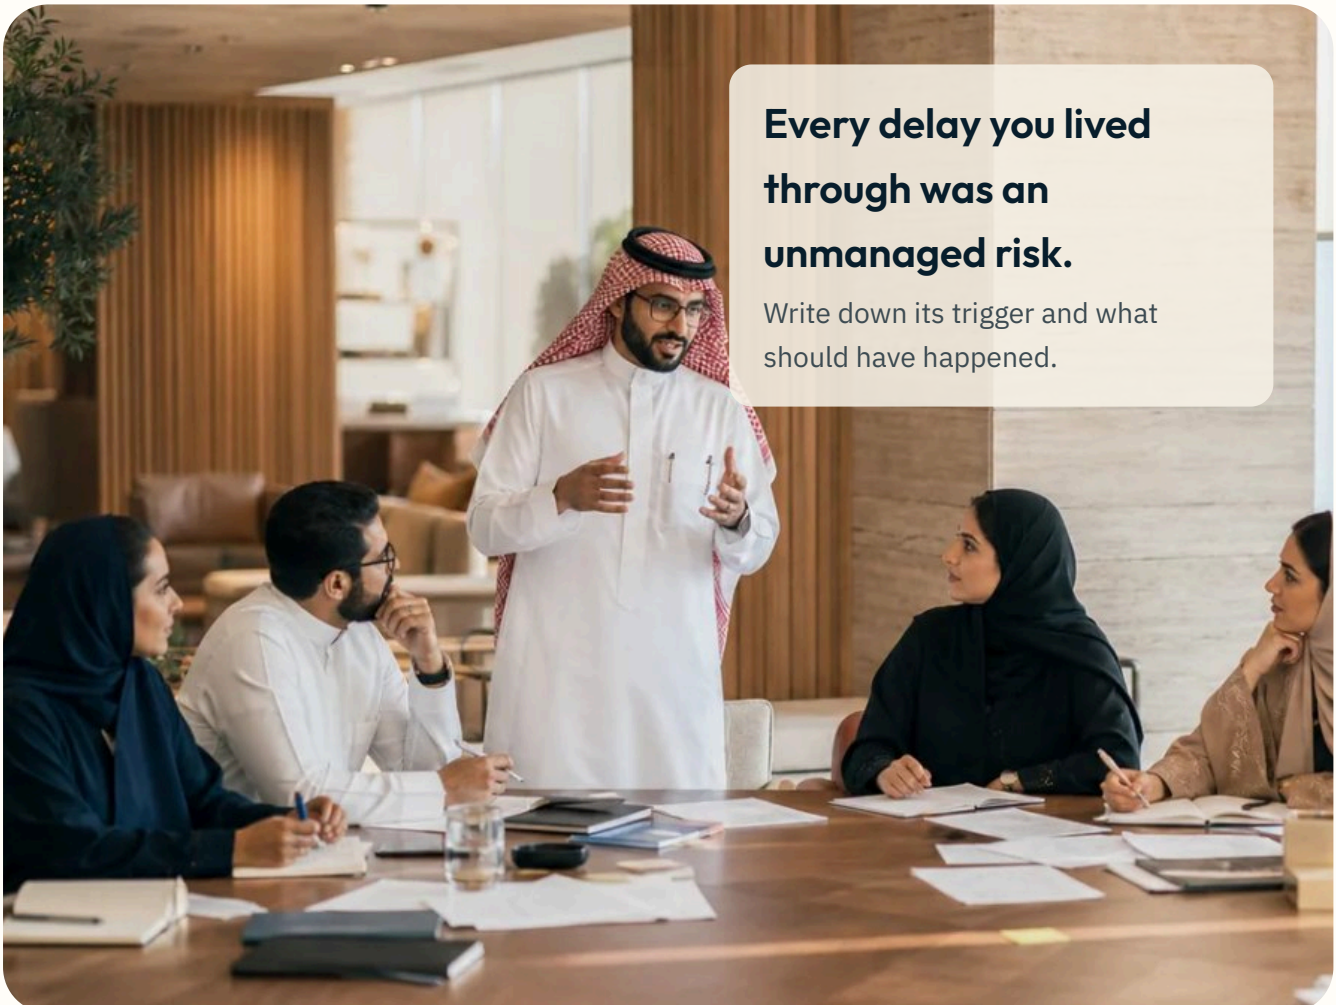

Expected value, decision trees and reserves on short numbers until they become quick.

They recur in analysis items.

A plan that fits your time

Study format, dates and any accompanying materials are confirmed with the Vertex Business team before enrolment, based on your level and available time.

Every delay you lived through was an unmanaged risk.

Write down its trigger and what should have happened.

STUDY PLAN

A practical plan from eligibility to exam day.

01 Confirm your eligibility route

Document your risk experience and education hours.

02 Start with strategy

Appetite, thresholds and the plan before the tools.

03 Master identification and analysis

The two heaviest domains in the exam.

04 Practice the calculations

Expected value and decision trees until they are routine.

05 Close response and monitoring

Response, owner, trigger and closure.

06 Revise by weight and error

Redo every missed question and note why.

Knowledge items

The tool, the term and where each sits in the risk cycle.

Situational items

The right next step in a specific project case.

“This achievement would not have been possible without the support, guidance and training I received... which prepared me for the exam.”

— Learner who earned CPTD · translated from Arabic · public post shown on the Vertex site

“What impressed me most was the trainer’s care that the information landed and that everyone had a chance to take part... and pointing out what matters most in the material.”

— CPTD learner about the trainer after a session · translated from Arabic · published on the Vertex site

“An excellent session. I learned important things about the certification and benefited a lot... everything was explained so clearly that I had no questions left.”

— SHRM learner after a live session · translated from Arabic · published on the Vertex site

About Vertex Business

Vertex Business provides professional certification training in talent development, human resources and project management, alongside a professional diploma in medical research and team training for organizations. Training pairs Arabic explanation that keeps the exam’s English terminology with application to real workplace decisions.

[Company details](#)

Applying for the exam

The eligibility application, exam fee and scheduling are handled by PMI.
